SUMMARY

Full Stack Web developer and current student of the University of Richmond's Coding Bootcamp with a background in Theatre from Virginia Tech. Skills in HTML, CSS, Javascript, and Jquery and strengths in collaboration, leadership, and creativity. With a strong background in theatre and collaborative arts, Jordan is a known team player with the ability to meet and exceed expectations and thrive in creative environments with strict deadlines. When approaching a project, prefers to build from functionality up, ensuring that it meets client requirements before adding a unique and creative flair to stylize the page to meet each client's individual personality. Jordan is eager to combine my background in the arts with my developing technical skills in full stack web development in order to create a unique web interface that stands out and is easily accessible to the user.

TECHNICAL SKILLS

HTML, CSS, Javascript, JQuery, Web APIs, Node.js, Github, Bootstrap, JSON, AJAX, Document Object Module, Terminal

PROJECTS

RVA Venues | https://github.com/Nickelme/RVAVenues | https://nickelme.github.io/RVAVenues/

- A collaborative project that utilizes the Spotify and Yelp Web APIs in order to allow the user to search for a song through Spotify, and receive a local venue recommendation in Richmond, Virginia that matches the theme of that song.
- Worked on developing the front-end UI and styling as well as assisting in merging the branches and final cohesion between developers.
- Created with APIs, Jquery, Materialize CSS, JSON, and HTML

Sarvay's Weather App | https://github.com/Jsarvay/weather-app | https://jsarvay.github.io/weather-app/

- A project that utilizes the openweathermaps API to allow for the user to search and receive forecasts for various cities and log recent searches for that user in local storage.
- Solo project, developed the full UI and javascript from scratch.
- Created with APIs, Jquery, Bootstrap, CSS, JSON, and HTML.

Together:Against | https://github.com/Bertodemus/LeopardLightning | https://leopard-ta.herokuapp.com/

- A Group project that utilizes an MVC approach. Allows users to create events by pushing to a MySQL database and then displays it in a way that allows users to discuss and vote on the user created events.
- Worked on developing the backend, designing the MySQL database with sequelize as well as passport to track user login and authentication, and html and api routes using express and node.
- Created with MySQL, Node, Express, Handlebars, Sequelize, Passport, jQuery, Javascript, JSON, and HTML.

EXPERIENCE

Theatre Production Technician 2016 – Present

John Tyler Community College   Midlothian, VA

Production support including lighting, sound, and production management, requiring flexibility and adaptability in order to meet tight deadlines. Collaborate with other designers and students to make sure all productions and events are handled as efficiently as possible. Educate students in the technical aspects of theatre, making sure they retain knowledge in order to apply it in the future.

EDUCATION

Bootcamp Certificate: University of Richmond, Richmond, VA

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, jQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

Bachelor of Arts in Theatre Arts and Cinema: Virginia Tech, Blacksburg, VA
